WATER QUALITY & SYSTEM IMPROVEMENT SURCHARGE

The Water Quality and System Improvement surcharge is applicable to all accounts in the Riverhead Water District. This new fee is charged on an annual basis. This surcharge fee will be utilized to support the construction and maintenance of Water District system to improve water quality and meet the requirements of the expanding regulatory and system requirements.

This surcharge will be used, at the approval of the Town Board, to fund the following items on the current Water District Capital Improvement plan but not limited to:

- Rehabilitation and or replacement of water storage tanks
- New facility construction to continue to meet the current and future demands of the District
- Maintenance, upgrades and rehabilitation of existing facilities to extend the useful life of the assets and to meet changing regulatory requirements
- New treatment system construction and maintenance of existing systems needed to meet all current and future federal, state and county water quality parameters
- Installation, extension and upgrading of water transmission or distribution facilities to improve transmission of water or improve water quality throughout the Riverhead Water District system
- Installation of monitoring wells and test wells to both find new sources of sustainable supply and manage the water resources of the Town of Riverhead
