B. No person shall place any obstructions or place, pile or store any nets, boxes, bait cans or fishing equipment or gear whatsoever upon any dock, wharf or pier or highway owned, controlled or operated by the Conservation Advisory Council.

C. It shall be the policy of the Town of Riverhead that all moorings, docks and appurtenant structures shall be designed, constructed, and located so as to reduce potential adverse impacts to natural resources and habitats, navigation, public safety, waterway congestion, and access to public lands and water.

D. The standards for a residential dock shall be as follows:

1. In no case shall the length of the dock exceed one hundred fifty (150) feet in length or exceed fifteen percent (15%) of the width of the waterway, whichever meets the minimum three (3) foot low water depth;
2. Only one dock may be constructed on a residential lot that has a riparian right. A waiver to this provision may be granted where a single dock is proposed for the common use by a maximum of three (3) adjacent property owners;
3. A residential dock and associated mooring piles must be configured so that no more than three (3) vessel berths are created for each residential lot with riparian rights;
4. The dock and any appurtenant structure, or any vessel tied to the dock, may not be located within or impinge upon that area located within ten (10) feet of the seaward extension of any property line;
5. The width of a catwalk or dock may not exceed four (4) feet and must be elevated a minimum of four feet above the mean high water mark and a minimum of four feet above grade when traversing any tidal or freshwater wetlands as identified by the Wetland Inventory Maps for the Town of Riverhead or those freshwater or tidal wetlands identified on maps prepared for the New York State Department of Environmental Conservation;
6. The width of any single float may not exceed six (6) feet in width nor twenty (20) feet in length and shall be secured or installed in such a manner that the float shall not rest on the bottom of the water body at any time during the tidal cycle.

E. The standards for commercial docks shall be as follows:

2. The width of a catwalk or dock may not exceed eight (8) feet and must be elevated minimum of four(4) feet above grade when traversing any tidal or freshwater wetlands;
3. The width of any single float may not exceed eight (8) feet in width and shall be secured or installed in such a manner that the float shall not rest on the bottom of the water body at any time during the tidal cycle;
4. All commercial docking facilities which provide fuel to vessels must also provide pump-out facilities for vessel sanitary waste;
5. A permit for the commercial operation of docking facilities must be applied for on an annual basis. The fee for this permit shall be ten dollars (\$10) per berth, with a minimum fee for this permit of fifty dollars (\$50) and a maximum fee of two hundred dollars (\$200).
6. A certificate of insurance indicating a minimum liability coverage of one million dollars (\$1,000,000) must be placed on file with the Town each year of operation.

- H. The disturbance of natural vegetation and topography during construction activities shall be minimized to the greatest degree possible. To this end, project- limiting fencing, siltation mesh, straw bales or similar devices for controlling land disturbances and retarding erosion and siltation shall be required during construction and during any clearing or grading of land preparatory associated with construction activities.
- I. No permit from the Conservation Advisory Council which is required for projects or activities in tidal waters shall allow the use of wood which has been treated with commercial copper quat (ACQ) pentachlorophenol, or creosote. Wood treated with copper chromated arsenate (CCA) may be used for pilings. All planking and framing must be constructed of material alternative to CCA treated wood.
