

Minutes of a Meeting of the Town Board of the Town of Riverhead, held in the Town Hall, Riverhead, New York, on Tuesday, June 21, 1983 at 7:30 P.M.

Present: Joseph F. Janoski, Supervisor
John Lombardi, Councilman
Victor Prusinowski, Councilman
Vincent Artale, Councilman
Louis Boschetti, Councilman

Also Present: Richard Ehlers, Town Attorney

Supervisor Janoski called the meeting to order at 7:30 P.M. and the Pledge of Allegiance was recited.

BILLS

Bills submitted on abstract dated June 21, 1983, as follows:

General Town	\$ 79,652.13
AM	2.00
Highway	1,535.57
Seniors Helping Seniors	179.41
Capital Projects	43,440.70
Discretionary	1,148.43

Councilman Boschetti offered the following resolution which was seconded by Councilman Artale.

RESOLVED, that subject to complete audit, the following bills be approved for payment.

General Town	\$ 79,652.13
AM	2.00
Highway	1,535.57
Seniors Helping Seniors	179.41
Capital Projects	43,440.70
Discretionary	1,148.43

The vote, Boschetti, yes, Artale, yes, Prusinowski, yes, Lombardi, yes, Janoski, yes.

The resolution was thereupon declared duly adopted.

Councilman Boschetti, "Irene those minutes were corrected?"

Irene Pendzick, "They're being corrected."

Supervisor Janoski, "The heads of the departments of River-Head Town Government are with us this evening should anyone have any questions of them. We will have reports Mrs. Pendzick."

REPORTS

Recreation Department: monthly attendance report for April and May, 1983. Filed.

Supervisor's Office: Financial statement for month of May, 1983. Filed.

Police Department: for the month of May, 1983. Filed.

Vail-Leavitt Music Hall: annual report for 1982. Filed.

Tax Receiver's Office: final reports of collections, dated 6/20/83. Filed.

Irene Pendzick, "That concludes reports."

Supervisor Janoski, "Thank you Mrs. Pendzick. Applications and Petitions."

APPLICATIONS AND PETITIONS

Parade Permit: Jamesport Fire Dept., for July 20th, 1983 at 7:00 P.M. Filed.

Special Permit: John Pelis, to operate non-nuisance industry on Rte. 25. Filed.

Petition: 12 residents of Wading River/Manor Rd. requesting more Police visibility in their area. Filed.

Site Plan: Malvese Company, for sales and service of auto machinery on Rte. 58. Filed.

Special Permit: Lessard family for a slalom ski course in Great Peconic Bay. Filed.

Irene Pendzick, "That concludes applications and petitions."

Supervisor Janoski, "Thank you Mrs. Pendzick. The time for the Public Hearing has not yet arrived so we will move on to the correspondence."

CORRESPONDENCE

H2M Corp., 6/17/83-re: refund from Amma Construction for Sewer Dist. tank. Filed.

Environmental Quality Review Board, 6/9/83-recommendation that the application of S. Udell/A. Danstrup is a Type II action. Filed

J. Stanton Pohl, 6/14/83-proposal re: landscaping at Flagg Country Club. Filed.

Reeves Park Community Center, 6/14/83-expressing appreciation to Police Chief for apprehension of vandals. Filed.

John Naughton Ins., 6/14/83-certificate of insurance re: Suffolk County Agricultural and Horticultural Assoc. & Worldlife Entertainment, et al. Filed.

Brookhaven Town, 6/13/83-notice of public hearing re: amendment to Chapter 85 of Town Code. Filed.

Southampton Town-notice of adoptions (4) to Town Code and notice of public hearing re; amendment to Chapter 69, Section 69-6 E of Town Code. Filed.

Suffolk County Dept. of Parks, etc. 6/10/83-re: appropriation for funding water main installation. Filed.

Suffolk County Dept. of PLanning, 6/6/83-re: notice of adoption to Brookhaven Town Code, Section 85. Filed.

Suffolk County Dept. of PLanning, 6/20/83-that D. White application is not within their jurisdiction; Cowan application is for local determination and a notice of adoption re: amendments to Southampton Zone Ordinance. Filed.

H2M Corp., 6/7/83-re: Sewer District maintenance Building. Filed.

Sen. Kenneth La Valle, 6/10/83-acknowledging receipt of resolution in opposition to Senate Bill #1. Filed.

County Executive Peter Cohalan, 6/10/83-acknowledging receipt of resolution in opposition to local law establishing Pine Barrens Watershed Preserve. Filed.

State Dept. of Transportation, 6/13/83-re: speed limits on Schultz Rd, River Rd., and Sound Avenue. Filed.

American Heart Assoc., 6/13/83-requesting permission to have Cyclethon travel through township. Filed.

Planning Board, 6/20/83-recommending that the applications of Udell and Koblyenski be approved; that the bond for Century Farms be released; and that professional advice be sought regarding Cowan application. Filed.

Irene Pendzick, "That concludes correspondence."

Supervisor Janoski, "Thank you Mrs. Pendzick."

UNFINISHED BUSINESS

Louis DeBenedittis-special permit for gas station on Pulaski Street. That is the subject of a public hearing this evening.

Hampton Bakery-special permit for bakery business on Edwards Avenue. That will be addressed in a resolution this evening.

Synergy Gas-special permit for additional 18,000 gas tank. That is under consideration by the Town Board at the present time.

Cablevision-request for renewal of franchise and rate increase. That is presently before the Town Board for its consideration.

Wm. Homer-special permit for auto repair shop on Pulaski St. and Osborne Ave. That is 354.

Daniel White-special permit to extend non-conforming use on Pulaski Street.

A. Danstrup/S. Udell-special permit to add to mobile home. The Town Board will be calling a Public Hearing on that.

Geo. and Mary Klatt-special permit for non-nuisance industry on Hubbard Avenue. That is before the Planning Board.

Frederick and Mildred Cowan-special permit for oil, coal and gas burner business. That is the subject of a Public hearing this evening.

Central Suffolk Hospital-site plan for addition and alterations. Will be addressed in a resolution this evening.

Riverhead Raceway-fireworks permit application for July 1, 1983. Pending the action of the Town Board.

Dieter Seichter-special permit to construct 1-family dwelling in Bus. "A". That's before the Planning Board.

Supervisor Janoski, "There are some seven minutes remaining before the first scheduled public hearing. I would recognize anyone who wishes to be heard. Yes mam."

PERSONAL APPEARANCES

Unidentified voice from the audience, INAUDIBLE.

Supervisor Janoski, "Well the rule here is that you only have five."

Dorothy O'Hare, "My name is Dorothy O'Hare. I come from Hanover, New Jersey and I have had a home in Reeves Park for 18 years."

Supervisor Janoski, "Speak into the mike because the proceedings are recorder and they become part of the record."

Dorothy O'Hare, "We have had problems with water. A couple of years ago it was nitrates, then we got a letter saying that there is temik and carbo furon in our water system. I went after Memorial Day, to Suffolk County, first I came here to pay my taxes and ask for a brochure. What is this temik going to do to me and my family? I don't know. You have to go to the County Center. I went to the County Center. Went to Board of Health. We don't know, you'll have to go to the Environmental Center. So I went over there. Nobody had anything and then they told me I had to go to Hauppauge. I said, if the trouble is in Riverhead, I have to go all the way to Hauppauge. I called this man on the phone. Very nice and I asked him specifically, will this do anything to shower with it? Can you absorb it through your skin? Absolutely not. You can only absorb it through your skin if you handle the raw chemical. In the mean time, I had written to New Jersey, the Environmental Protection Association and this is the reply that I got. Enclosed is the information on temik that I was able to obtain for you through the Chemical Substances Information Network. Well that's alot of..... Anyhow, temik is a very toxic pesticide that causes neurological disorder; such as headaches, nausea, chest and abdominal pain, and muscle convulsions. The study by the Suffolk County Department of Health Services referred to in the abstract, found a link between temik and spontaneous abortions. However, these results have been challenged by the Union Carbide, the manufacturers of temik. In researching this question, I spoke to Theodore Goldfarb, an associate professor of chemistry at Stony Brook. He conceded that the study by Suffolk County was not thorough enough and could be easily challenged. However, he did point out that the County Health Department had endorsed the findings and I should certainly contact the County Health Department and find out what there current position was. Professor Goldfarb is not confident about the level of 7 parts per billion of temik in drinking water that is allowed by New York. He recommends limited contact to bathing in water that has a level greater than 1 part per billion. I have recently spoken to him on the telephone and he said anybody with young children should no put them in the bath tub. Don't let them soak in it. Quick showers dry them off and that's that.

PERSONAL APPEARANCES ContinuedDorothy O'Hare Continued

He recommends that you have your water tested immediately and then he states that Suffolk County is requiring Union Carbide to supply filters to homeowners who's wells, whatever. We have a well system with 176 families on it. It will not do us any good to dig our own wells because that was the first thought that Mrs. (name inaudible) had. She can not dig any deeper than she has now because she'll hit salt water, so if I dug my own well and everybody else there dug, we would have the exact same thing. I want town water and your Board of Health lied to me or they have very very bad information and that is a disgrace."

Supervisor Janoski, "It's not the Riverhead Board of Health. Let's make that distinction. Suffolk County."

Dorothy O'Hare, "Suffolk County, ok. Over there, as I said, either they have very bad information or they lied to me and I want somebody to find out the truth. I have a daughter who is newly married. I have a daughter-in-law and if anything happens to them... I drag my water from Jersey. How long can you do that? Who do I trust? They have a red handle that says this is filtered water. I am not going to believe them. I want town water and I want it now."

Supervisor Janoski, "If you had town water you would have to believe us too, but that's beside the point."

Dorothy O'Hare, "Well you told me that your wells are 300 feet deep."

Supervisor Janoski, "Yes. We are down to the second aquafor."

Dorothy O'Hare, "My point is, I want correct information from somebody."

Supervisor Janoski, "As you point out, there is a great deal of dispute as to what it means to have temik in the water. What the results are, what effects it has. One of the questions that I tried to get an answer to today was; who is Dr. Goldfarb? Only because, as for as many Dr. Goldfarbs that exist, you will find a number of experts in the field who will say that there is nothing to fear."

Dorothy O'Hare, "Do you have a copy of the toxicity report?"

Supervisor Janoski, "Well we read it this afternoon."

PERSONAL APPEARANCES Continued

Unidentified Speaker , "Can I interrupt?"

Supervisor Janoski, "No you may not. I will recognize you and you can take the microphone. Let us discuss public water. First of all, we have been working with the County. Today we spent a great deal of time contacting F.M.C. and of course Union Carbide. There was, you know what the problem is. Temik is 4 parts per billion, the low, the problem area, what they have identified 7 parts per billion."

Dorothy O'Hare, "They told me that directly from the well it was 16. Martin Trent of the Suffolk County Board of Health told me that."

Supervisor Janoski, "What they are doing is tests now which indicates that it's 4 parts and who knows?"

Eric Berger, INAUDIBLE.

Supervisor Janoski, "Mr. Berger you're out of order."

Eric Berger , "You were wrong."

Supervisor Janoski, "Mr. Berger I will have you removed from this chamber if you do that again."

Eric Berger, "Fine."

Supervisor Janoski, "Thank you. Where was I at?"

Dorothy O'Hare, "The tests are different all the time because I have three newspaper articles."

Supervisor Janoski, "4 parts per billion and 8 parts of flouro carbo. Ok. That's the latest information we have, contrary to the News Review. But your right, the levels do change. I'm sure that if every day, if you make a test, you would get some different readings. But that's neither here nor there because what the problem is that we need a solution. A quick one which is a filter. Ok. So we have been in touch with F.M.C. They have indicated to do that. They will share in the cost of providing this filtering system for your private system up there."

Dorothy O'Hare, "With whom will they share?"

Supervisor Janoski, "With Union Carbide."

Dorothy O'Hare, "Oh. Three weeks ago, Union Carbide, Shirley Howland told me that F.M.C. was going to have, it was all cut and dried and the filter was on it's way to being installed."

PERSONAL APPEARANCES Continued

Supervisor Janoski, "There was a break down obviously, because what I am saying is that the test readings now indicate a level below what is considered to be the cut off point for acceptable level so that there is no responsibility from either company. But as I said, we have contacted them. We have got an indication from one of them that they will share in the cost of providing the filter. Union Carbide we have been in contact with them today and there is no one who we were able to reach who have the authority to say yes we will share the cost. But tomorrow we will be back at it again. Now that is an interim solution."

Dorothy O'Hare, "There is a Mr. Andresen, he is the project manager."

Supervisor Janoski, "Now hopefully tomorrow, we will be able to tell you that Union Carbide has agreed or indicated an agreement that they will share in the cost. If we can get the two companies to agree to that, then we have got that interim solution which is the filter. We both know what the permanent solution is and that's public water."

Dorothy O'Hare, "How reliable are these filters?"

Supervisor Janoski, "From our indication, they are very effective."

Dorothy O'Hare, "How often are they changed?"

Supervisor Janoski, "They are changed when an amount of water runs through them that dictates, what happens is that the water is tested on their side of the filter and they have a mechanism and they can judge from the amount of water that passes through it when the water should be checked and the filter changed. That is something that the County Health Department would be on top of. Now as to the other problem, which is the extension of public water up to Reeves Park. As you're aware, we the Town Board just negotiated an agreement with the developers of the Baiting Hollow Country Club and we went into that, wanting and demanding that they pay for an extension up to that area. The reason we did that, was so that we could have public water on that north shore area so that we could branch out from it and reach communities such as yours because your north shore area is the second area that uses the second largest quantity of water. Now it is not the Town of Riverhead that has a Water District. We don't extend water systems. It is the Riverhead Water District that, two separate entities. It is very much like the Riverhead Town and the Riverhead School District, two separate things. The Town Board is the governing body of the Riverhead....."

PERSONAL APPEARANCES Continued

Dorothy O'Hare, "Do you know any people to complain to?"

Supervisor Janoski, "I know that, but what I try and do is explain the situation. If the governing body, which is us five gentlemen, decided that, yes we will make an attempt to extend water to you community in Reeves Park, we would go forward and contact our engineering company, which in this case would probably be H2M, who is here tonight. I saw Sam in the back there. We would ask them to draw up some maps that would delineate the area to be extended in the Water District and then we would have some preliminaries designs done which would come up with the approximate cost of the extension and then we would have to go to the State of New York, the controller, who would tell us if we could do it based on the value of the property within the boundaries of that extension of the Water District because it is the Water District, these people who would receive the extension who would finance the extension."

Dorothy O'Hare, "I believe it should be the chemical companies because if it wasn't for them....."

Supervisor Janoski, "I could go along with that."

Dorothy O'Hare, "Well you have a township attorney. I really believe that that's what should be done. There's state money available and there's federal money available for cases just like this. It should not be passed on. I don't mind paying for it. If I could have it tomorrow, I would pay for it, but these people aggravate me. I mean, they've ruined everything because of their carelessness. They were supposed to have, in the papers that you received, they were supposed to have done all kinds of tests. It was impossible for it to filter down into the ground water. Well it's there."

Supervisor Janoski, "In different types of soil but not in our type."

Dorothy O'Hare, "Well."

Supervisor Janoski, "That was the mistake that was made."

Dorothy O'Hare, "Well in the report it said of the different types of soil of having muck made."

PERSONAL APPEARANCES Continued

Supervisor Janoski, Mrs. O'Hare I'm going to have to interrupt you because we are four minutes beyond the Public Hearing time. We will open up this discussion again once we're finished with the Public Hearing, but I have to go by the schedule that's been published. Thank you Mrs. O'Hare. Let the record show that the hour of 7:49 has arrived and the Town Clerk will please read a notice of Public Hearing."

PUBLIC HEARING - 7:45 P.M.

LOUIS DEBENEDITTIS

I have affidavits of publishing and posting of a public notice for a public hearing to be held at Riverhead Town Hall on Tuesday, June 21, 1983 at 7:45 P.M. to hear all interested persons regarding the special permit application of Louis DeBenedittis to re-establish the use of a gasoline station at the intersection of Pulaski Street and Griffing Avenue.

Supervisor Janoski, "Thank you Mrs. Pendzick. Is there anyone present representing the applicant?"

Albert D' Agostino, "Mr. Supervisor, members of the Town Board, ladies and gentlemen; my name is Albert D' Agostino. I am an attorney. I'm representing the applicant herein, Louis DeBenedittis. The petition, which I believe that you have before you, indicates in accordance with the notice that was read, that my client has filed an application pursuant to the provisions of the Building Zone Ordinance to the Town of Riverhead in order to re-establish an existing gasoline station use at the subject property, which is located on the south west corner of Pulaski Street and Griffing Avenue. My client's contract then be the property is presently owned by Chevron U.S.A. At the time that the contract for the purchase of the property was entered into, I inquired of the Building Department as to the existence of a certificate of occupancy and it was determined that the service station was being operated as a non-conforming use. That the use had terminated on or about August of 1981. The contract was entered into late last summer. Hence, the application before you. In addition to the application to reinstate the gas station use by special permit, there is also an application for permission to store not more than five vehicles out-doors at the subject premises in connection with that use. If there are any specific questions I would be happy to try to answer them."

Supervisor Janoski, "Thank you. Does any member of the board have any questions?"

Councilman Artale, "Yes I have one. Is Mr. DeBenedittis going to be running this gas station on his own? I've noticed since I have driven by there, there are for rent signs on there already."

6/21/83

PUBLIC HEARING Continued

Albert D' Agostino, "It is not his intention to run it himself but to lease the station to an operator hopefully a local operator."

Councilman Artale, "Thank you."

Supervisor Janoski, "Is there any member present who have any comment on this application" That being the case I declare the hearing closed. Thank you very much."

Albert D' Agostino, "Thank you very much gentlemen."

Supervisor Janoski, "We got two minutes. There are two minutes remaining until the next scheduled Public Hearing. Does anybody wish to be recognized? Yes sir."

Fred Hausen, Creek Road Wading River, "Good evening Mr. Janoski. My name is Fred Hausen and I have a little problem and I hope you can help us solve it. In fact, some of my neighbors have the same problem. We live on Creek Road in Wading River and we have 4-wheel drives driving up and down the beach and we understand there is a beach patrol from the Police Department to try to prevent this sort of thing and we think that's great, but the other night, recently we asked the Police not to drive their 4-wheel drives on the beach right by our decks by our house and they said, "Well they are the beach patrol." I said, "look we don't want any 4-wheel drives up here and we would appreciate if you would abide by the rules and stay down by the tide line and I noticed in the description of the beach area here and the document put out by the Town for beaches and recreational centers they describe the beach areas as between the low tides and the high tides for 4-wheel drive and they give the times and permits and so on. We had quite a discussion because they said they are beach patrol, they had this right to do this and I told them it's my private property and I would appreciate you not doing it. Well they instructed me to call the Lieutenant. I called the Lieutenant and I didn't get much satisfaction there. I don't know why we have to defend our property against the Police Department. We think there's a mix up some where."

Supervisor Janoski, "I'm sure there is. A Mr. Wood was in to see me last week I believe. He must be a neighbor of yours."

Fred Hausen, "Charlie."

Supervisor Janoski, "Yes. He related the same story to me and of course I said they have to be below the mean high water mark, tide mark. I then called the Police Department and spoke to the chief directly, asked that they re-instruct it to keep below that area. No infringe on (public) private property."

6/21/83

PERSONAL APPEARANCES Continued

Fred Hausen, "All right, I appreciate that and if that situation is taken care of we like to thank you for it. There is one other thing that I had at this time too and this will take about thirty seconds and then I'll be off. The access to the beach there, that old ramp that hasn't been used in ten years and probably will never be repaired until you see fit or the Town sees fit. If that was some how closed off then it wouldn't be any big problem down there because that's the access to the beach is right there."

Supervisor Janoski, "Well we cannot close off access to the beach because everythin below that mean high tide mark is public domain and everyone does have the right to use that strip of beach. Everything below that of course is private property. We are going to be doing, hopefully in the very near future, some renovation on that beach facility but we need that access in there. Now, we are talking about the gates and all sorts of measures to walk up things to prevent the kinds of problems that you're having. Not from the Police Department but from visitors, let's call them, but the Town Board is considering a number of steps and of course that will be one of them. That we close that off or like it was."

Fred Hausen, "I'm wondering if this would be under the category of a public nuisance, leaving this defunct ramp there. That is creating the problem and who owns this ramp? I presume the Town does."

Supervisor Janoski, "The people of the Town of Riverhead."

Fred Hausen, "And would this be a public nuisance created by the Town who just left it there and I understand the access to the beach or something, but if it could be manned or somehow, or some kind of jurisdiction put on this maybe it would cut down all the problems that we have."

Supervisor Janoski, "As I say, we are looking into the problems associated with having recreation facilities in the Town and there are many of them and that's one of them we'll take under consideration and see what will come of it."

Fred Hausen, "Ok, fine. Thank you very much."

Supervisor Janoski, "Thank you." This is the application of Frederick and Mildred Cowan. The Town Clerk will please read a notice of Public Hearing."

PUBLIC HEARING ContinuedPUBLIC HEARING 8:25 pm.

I have affidavits of publishing and posting of a public notice for a public hearing to be held at Riverhead Town Hall on Tuesday, June 21, 1983 at 8:25 p.m. to hear all interested persons regarding the special permit application of Frederick and Mildred Cowan to use premises located on the east side of Kroemer Avenue to design and fabricate large capacity oil, coal and gas burners.

CORRESPONDENCE:

1. PLANNING BOARD 6/20/83:

The Planning Board neither approves or disapproves the said application for a special permit. They note that the area appears proper for such a venture, which could conceivably benefit the Town. They add that much of the work would be experimental especially in the field of BTU coal burners. They recommend that the Town Board secure professional advice before reaching a decision.

2. SUFFOLK COUNTY DEPT. OF PLANNING 6/20/83:

Advising that the application is a matter for local determination.

Supervisor Janoski, "Thank you Mrs. Pendzick. Is there anyone present representing the applicant? I was wondering who you were. Anybody who has a suit and tie on in this weather is crazy."

Richard J. Cron, "If it pleases the Board, my name is Richard J. Cron. I am an Attorney at Cutchogue, in the Town of Southold, which I heard referred to before. I am not exactly certain we'll need your water but who knows. I'm here representing Mr. and Mrs. Cowan who are presently contract vendees of premises situated on the east side of Kroemer Avenue, in Riverhead which they are purchasing from the Kroemers and the contract itself is conditioned upon securing a special permit from this Board which would enable them to do what you had read in your Public Notice. We did appear before your Planning Board on the 16th of this month and it was an interesting experience. I think your Board is quite astute. I brought Mr. Cowan with me to that Board and I also have him here this evening

PUBLIC HEARING ContinuedRichard J. Cron Continued

simply because the amount of engineering I could tender to you on the subject, would fit on the head of a pin, so we think that the application that we have pending before you will be advantageous to the Town of Riverhead and it's unfortunate to some degree of pollution might occur. We thought that we made it perfectly clear to the Planning Board what we would anticipate none what so ever. That whatever controls and requirements that would have to be met to perform the type of research and development that this project would entail, would not result in any great pollution. In fact, the amount of fuel that you could expect to burn per hour, would be in the neighborhood of 150 gallons and a very small school burns 50 gallons per hour. There will be no pollution as far as we are concerned. The area in which the project is anticipated, is an area that is presently industrialized and certainly commercialized so that we believe that what we intend to do, would fit nicely into the area and while the term large furnaces and burning coal are used, it isn't anticipated that probably any of the burning and the research and development would probably go on for much more than ½ hour at a time. It's not something you're going to have constantly going on you know, eight hours a day."

Supervisor Janoski, "We had a discussion on your application this afternoon and it's my understanding that emissions from your operation, you would be under the control of the State of New York. That you would have to meet, the applicant would have to meet the requirements of the Clean Air Act of the State of New York."

Richard J. Cron, "Absolutely, and Mr. Cowan is obviously prepared to do what ever is required in that regard."

Supervisor Janoski, "Is there any question?"

Councilman Artale, "No, you just answered."

Supervisor Janoski, "John? Does anyone present have any comment or question of the representative of the applicant? That being the, pardon me?"

Unidentified Speaker, "What is it?"

Supervisor Janoski, "Ok, I'll let that one go. What is it?"

6/21/83

PUBLIC HEARING Continued

Richard J. Cron, "What is it? It's basically a research and development project and as indicated in the notice that it's intended to design and use large types of furnaces to burn coal, fuel and oil on a research and development basis to find the best way to burn different types of fuels."

Supervisor Janoski, "Research."

Richard J. Cron, "Yes. Basically. I think I am fairly stating that. Am I not Mr. Cowan?"

Supervisor Janoski, "Is there any other comment? Mr. Benedict. I don't think this solves the problem on Fanning Blvd. Dick."

Dick Benedict, "No, but it's basically the same. Kroemer Avenue was recently paved, which was up to that point, one of the worst roads you could go down. What type heavy equipment will be used on this road if this is approved? What will it do to the recent paving?"

Richard J. Cron, "You'll have to pardon me because there's certain areas I'm not certain I can answer, so I would just as soon have Mr. Cowan answer."

Frederick Cowan, "Good evening. I'm Frederick Cowan. The amount of coal that we'd be using would be a gift from our customers and would be coming in small truck loads. Probably in the neighborhood of four or five tons at a time. All we need would be about two tons to determine what we're going to do with that particular coal and we wouldn't have room for all the different coals that could come in so we restricted just the amount of areas just for small trucks."

Supervisor Janoski, "Would you just for the record, would you indicate who your neighbor to the north is?"

Frederick Cowan, "Oh. That's Miller, the cement fellow is to the north."

Supervisor Janoski, "Ok. Thank you. Is there any other question or comment from members of the audience. Yes mam. You have to come up to the microphone mam. This is a legal process which has to have record."

Bernadette Voris, "For the record. Bernadette Voris again. What great benefit does this Town derive from adding another little drop to the falling rains? That's always my question. In other words, is it worth it to us? What kind of, evidently it must mean money. I don't see any other value. A test facility is very valuable in itself but I don't know if this type test facility,

PUBLIC HEARING ContinuedBernadette Voris Continued

even though it meets State standards. State standards for water are very debateable over this country."

Supervisor Janoski, "Yes. We're discussing that aren't we?"

Bernadette Voris, "So you know my ultimate question is; why these folks like to pick Riverhead? Why would you say yes to this? If you were to say yes, or who ever would like to answer. I'd like to know what is this tremendous benefit that would bring us to say yes to these people?"

Supervisor Janoski, "And that's a question of the Town Board? Not of the applicant."

Bernadette Voris, "Yes, it really is."

Supervisor Janoski, "Why don't we have the applicant make his statement and then I would be happy to offer my comment."

Frederick Cowan, "It comes in the nature of political question but it's obvious that who ever goes to the store to buy some goods, had to earn their money some where, so we're just bringing so much more employment. That's one of the greatest benefits that the local area will receive. The area that we're picking on would never be available for any other kind of device in any case. It's not, I wouldn't put a condominium there or anything of that nature."

Richard J. Cron, "I would just like to make an observation. If we're talking about little drops, I assume you'll cease all building within the Town of Riverhead."

Supervisor Janoski, "Now, if you're looking for my particular comment and of course any member of the Town Board can follow suit. One of the things that we have been trying to do, was to attract the small industry business into our community, to provide employment, to provide tax revenue. Now as to what he's doing, one of the cries I hear constantly, is that we have to develop technology to efficiently burn things like coal and oil. That's what this project is all about. Certainly it seems like a valid enterprise in view of a number of factors at the present time. I won't bring up one of them because I don't even like to talk about it any more but this kind of research about coal use, efficient use, to replace oil or visa versa, is certainly, I think is valid and I quite frankly would be proud that this research is going on within the Town of Riverhead. Just a minute. Ok. You're up. We're going to have a smoke break. Yes I have to go back to the two public hearings."

John Littlefield, "This guy's just going to burn coal and oil just to see how better he can do it? What's he going to do with all the extra heat that he makes?"

PUBLIC HEARING Continued

Supervisor Janoski, "I have to answer that?"

John Littlefield, "Is there going to be a by-product of this heat?"

Supervisor Janoski, "I don't know? How far are you away from Kroemer Avenue?"

John Littlefield, "You see. This is what happens. Somebody comes in with a research. He's going to burn a little coal or something. All of a sudden, somebody says; hey listen, I could use the steam, so they run a steam pipe. Then the guy needs more steam so he's burning more coal. So it's not no more a drop of pollution. It's a little more. Is there any state guards that this guy can't go into another business on top of this?"

Supervisor Janoski, "Sure."

John Littlefield, "Yeah. Like what?"

Supervisor Janoski, "This hearing that we're having right now which was held to determine whether we should allow him to go into the business that he wants to go into."

John Littlefield, "This one now?"

Supervisor Janoski, "Yes."

John Littlefield, "Yeah, but once he's in business he's got his foot in the door."

Supervisor Janoski, "Well you see, one of the things that this Town Board does and I guess we do it because of this kind of possibility, is that when we grant a special permit, we usually nail it down pretty good as to what he's allowed to do. Put in restrictions, requirements etc. etc. and we will probably fix it so that if he wants to do anything different or more, that he would have to come back here."

John Littlefield, "Even to bake a cake with all that heat?"
Ok let's have a cigarette break."

Supervisor Janoski, "Ok. What a minute. You have to wait for us."

John Littlefield, "Why."

Supervisor Janoski, "If we have to stay here so do you. Is there any other question or comment? A member of the press?"

PUBLIC HEARING Continued

Press, "Approximately how many people will he employ?"

Supervisor Janoski, "Ok. I wish the press would save those comments for other times which are more appropriate."

Frederick Cowan, "I'm always getting that question and my guess is within the next two years it will be up to about twenty people."

Supervisor Janoski, "Thank you. Now that may not seem like a lot of work people to you, but in the Town of Riverhead, in total, there are only 45 hundred people working, so twenty people is a nice addition to that. It will probably be a significant reduction in the unemployment rate. I have to, let me just ask this question. Mr. Kasperovich were you going to talk to this issue?"

William Kasperovich, "Yes."

Supervisor Janoski, "Ok. In that case I'm going to recess this Public Hearing. I will come back and open it up again. The reason I ask that is because is if there is no more comment I would have adjourned it. We have one more Public Hearing to open and that is the matter of Mr. Daniel White and his non-conforming use on Pulaski Street. Let the record show that the hour of 8:45 has arrived. We are ten minutes late now, but the Town Clerk will please read a notice of Public Hearing.

Supervisor recessed the
Public Hearing at 8:45.

PUBLIC HEARING - 8:35 p.m.

I have affidavtis of publishing and posting of a public notice for a public hearing to be held at Town Hall on Tuesday June 21, 1983 at 8:35 p.m. to hear all interested persons regarding the special permit application of Daniel White to extend a non-conforming use located on Pulaski Street.

CORRESPONDENCE:

1. Suffolk County Dept. of Planning, 6/20/83:

Advise that the application is not with the jurisdiction of Suffolk County.

2. Environmental Quality Review Board, 5/12/83:

Recommending that the application is a Type II action which will not have significant impact upon the environment.

3. Planning Board, 6/3/83:

Recommending that the application of Daniel White be approved.

PUBLIC HEARING Continued

Supervisor Janoski, "Thank you Mrs. Pendzick. Is there anyone else present representing the applicant?"

Pierre Lundberg, "My name is Pierre Lundberg of 56 Griffing Avenue, New York. I'm obviously the attorney because I have a tie one, or Mr. White. I think you have the application before you. The plans are before you. This is one of three at least permist that we would have to obtain in order to make this extension of one more apartment, where there are now two presently existing. We have to go to the Zoning Board of Appeals. We have to go to New York City. To the fire control people there to se whether or not the thing will fit. I would like to offer a statistic that I offered to the Planning Board, which comes from the Census Bureau computer print out, summary type file 3A of Riverhead Town page 14, which is the census of population and housing of 1980. In Riverhead there are nine thousand, as of 1980, 9158 total housing units which include seasonal and migrant. Of that number, at that time, there were 130 vacant for rent. The average percentage of vacancies in the County, I am advised by the Community Development Office, is 5%. The figure for Riverhead is 1.4%. We think in a very small measure, we would increase that percentage by adding another apartment and I think other wise you may realize we are trying to stabilize a rough condition that is causing leaks to tenants, as well as the main building. We have adequate parking available. If there are any questions, Mr. White is here to answer those."

Supervisor Janoski, "Thank you Mr. Lundberg. Does any member of the Town Board have any question? Does any member of the audience have any question or comment regarding this application to extend the non-conforming use on Pulaski Street which is in reality an extension of the building upward. Do you have any comment Mr. White?"

Daniel White, "No thank you."

Supervisor Janoski, "There's someone who knows when to quit when they're ahead. Thank you Mr. Lundberg. This hearing is adjourned."

Pierre Lundberg, "Thank you sir."

Supervisor Janoski, "I think that's all of them. I got one more."

PUBLIC HEARING ContinuedSupervisor Janoski Continued

Cowan. I re-open Cowan. Does anyone wish to address the Town Board, (chocolate crouler, black sweet-n-low. That makes no sense at all does it.) on the matter of Cowan? Mr. Kasperovich."

William Kasperovich, "It's just as unpleasant for me here to talk, as it is for you to listen, but this what you get paid for and if you don't like the words I use; it's by your own conduct. We recently had a discussion about a storage tank for liquified gas. People were very much concerned with a small storage tank. Reference was made to requirements, safety requirements by New York State. Here again the emissions are referred to as New York State. My concern here is a lack of knowledge because you write up to fabricate large capacity oil, coal, and gas burners. Now the stand-by quantities and the manner in which these quantities are used and in what state are not necessarily covered by New York State requirements. These safety requirements are of the Town's concern."

Supervisor Janoski, "Are you talking about air standard or safety?"

William Kasperovich, "Safety. The emissions out of the stack is fairly covered by the State but the various safety features that are required in developmental and experimental proceedings are not covered by them."

Supervisor Janoski, "You know Bill, I never mentioned that but I'll certainly be happy to let the applicant answer your concern about the safety aspects of it."

William Kasperovich, "Now it mentioned something about 4 or 5 truck loads of coal. It's hard to utilize a developmental procedure for coal burners. Unless he's talking about these 20 ton trailer trucks."

Supervisor Janoski, "Why don't we..."

William Kasperovich, "Which is quite a large pile of coal."

Supervisor Janoski, "Why don't we allow the applicant..."

Councilman Lombardi, "Bill I think he said 4 or 5 tons in a truck."

William Kasperovich, "All right. Now that sort of puts it, perimeter around the project. Four or five tons of coal doesn't make a particularly large pile, nor in what ever states particularly dangerous. However, we don't know whether they're going to use powdered coal or a fluid of sorts which is like

6/21/83

PUBLIC HEARING ContinuedWilliam Kasperovich, Continued

talking about a dynamite plant. As there are unknown areas in the discription of what they're going to be doing. How much of a reserve tank for gas they're going to have. What kind of gas and what kind of sewage tank and under what pressures, can be as much concern to the Town as we had for the liquified gas the other night. So these unknown questions of what will be done and how it will be done, sort of stirs the imagination that there are dangerous aspects to be considered. Period. Thank you."

Supervisor Janoski, "Thank you Mr. Kasperovich. Mr. Cowan are you going to..."

Frederick Cowan, "If I may."

Supervisor Janoski, "I wish you would."

Frederick Cowan, "First I think they're all very good questions. Before, I said we were going to employ about 20 people. I might add that 15 of them will be in the price range of 40 thousand dollars a year on up. They'll all be engineers and qualified for this type of program. The main reason for this R&D programs is, to burn these fuels in the safest and least polluted ways. Not just for the State of New York standards but mostly for people like Los Angeles, that are considerably worse than ours. The pollution equipment itself, just to capture whatever pollution coming out of that fuel, rather than it going up the stack, are going to be collected by devices that we're putting in the plant. The cost of that material will be in excessive of a million dollars. The instrumentation that goes with it, will be about ¼million dollars. These will not only be financed by us but also by our customers who are using the utilities that are continually challenged by these various states and committees, to burn the cheapest fuel in the best way. They want them to take any kind of fuel that comes on the market and burn it in a magic way so that there won't be any pollution. It's obvious to most of us that most of this can't be done but some where between the lines there are some things that can be done better and that's the purpose of this lab. We have as much concern about the safety of ourselves burning this equipment then naturally blowing up anything. So that everything we do would be done under safety precautions which is a way it's done normally anyway. Again by these very well trained, very well educated people. So I guess that should answer most of the questions. I hope."

Supervisor Janoski, "Thank you Mr. Cowan. My friend the teacher."

PUBLIC HEARING Continued

Bernadette Voris, "Another comment. Research and development is very nice but I don't know what it's doing on an Island that is so very small. I don't see where coal which I think the nearest source of supply is not very near us. I realize that coal is only one of the things to be used. I would caution the Board. I would think twice maybe three times in this area because again I asked you before. What was the ultimate value. It sounds like these jobs might not be people here, all of them ok. That would be the first thing. So the 20 individuals, let's say for a lack of whatever number, may not be local people. That might be the first thing and secondly again I don't like to go over a point, but I'm interested in the environment. We haven't got any other place and I'm sure you are too. Riverhead is in your care."

Supervisor Janoski, "You know, I consider the economy to be a vital part of the environment."

Bernadette Voris, "I know that but I think we're going to have to make a decision along the road because if you have no water to drink and you know, you've got everything polluted. You could have lovely economy but the people won't be there."

Supervisor Janoski, "Do you have an alternate source of fuel in mind for all this?"

Bernadette Voris, "I don't even want to get into that point alright."

Supervisor Janoski, "Briefly."

Bernadette Voris, "I have plenty. There are many possibilities."

Supervisor Janoski, "You're a teacher and I'm sure that..."

Bernadette Voris, "I can foresee this being a waste facility alright. Where he just said that various companies would bring their things to be tested. These fuels, Con Ed, LILCO, etc., etc., etc. I don't see where this town, which to me is a rural town, I would like it to remain rural."

Supervisor Janoski, "Do you have any idea where this plant is to be located?"

Bernadette Voris, "I don't. I'm going to go and find this spot."

Supervisor Janoski, "You'll find that across the street from it is a very large automobile grave yard."

Bernadette Voris, "Oh then I know where the place is."

PUBLIC HEARING Continued

Supervisor Janoski, "Just to the north of it is a large cement block."

Bernadette Voris, "Yes and duck farms or something...."

Supervisor Janoski, "To the south of it is Suffolk Etched Products. It is an industrial area. To the west of it is a sand pit. It's not the garden spot of Riverhead."

Bernadette Voris, "Ok, then I just say this, it's not the garden spot but do we have to add to it? That's all I leave you with. Do we have to add to it?"

TAPE ENDED AND TURNED OVER
PART OF THE CONVERSATION
WAS CUT OFF.

Florenz Pellitero, "In response to those questions about the, there should be limitations on these buildings that you're going to put up. How big a gas tank are you going to put up? How big? You know I'm from Staten Island and I bring water from Staten Island."

Supervisor Janoski, "Where do you work sir?"

Florenz Pellitero, "I did work for the City of New York as a deck head and when you're talking about large pipe, 12 inches is a large pipe believe me. Twelve inches is a lot of pipe."

Supervisor Janoski, "Are we talking about the Cowan application?"

Florenz Pellitero, "No. I want to get back to that."

Supervisor Janoski, "I'm sorry you can't do that sir."

Florenz Pellitero, "I'm talking about the...."

Supervisor Janoski, "I'm sorry sir you're going to have..."

Florenz Pellitero, "I'm talking about the tanks, the tanks."

Supervisor Janoski, "What are we talking about?"

PUBLIC HEARING Continued

Florenz Pellitero, "The size of the tanks. There should be limitations on storage tanks or gas tanks. We had a blast in Staten Island and you better believe it. You'll never have a gas tank. Them people that are putting that L.P.G. tank in Staten Island, they don't care. They don't live there. We let these people live here. They're Americans."

Supervisor Janoski, "You're very off base on that."

Florenz Pellitero, "No I'm not off base. We're talking about what he wants to do. How large a tank are you going to put? A five or ten gallon tank or 500 million gallon tank which is an important question. The capacity of the tank or the oil that's going to contain this fuel. Now, like I'm bringing it back. In Staten Island, guaranteed, you'll never see another P and G tank. I don't care who owns it because all them people that are going to profit from that tank live else where. They don't live in Staten Island. We don't want stuff like that in Staten Island. We don't want it here either. Going back to the question of the water, I'll bring up the question of the water."

Supervisor Janoski, "Sir."

Florenz Pellitero, "I'll come back up again."

Supervisor Janoski, "No you won't sir."

Florenz Pellitero, "I will. I don't care if I stay here until tomorrow."

Supervisor Janoski, "Me either but we're going to do this according to the books."

Florenz Pellitero, "Why we want to get things settled. We want action, action."

Supervisor Janoski, "I agree with you. Thank you sir. Does anyone want to address the Town Board on the application of Fred and Mildred Cowan. That's the research thing. Yes mam."

Pat Panchak, "My name is Pat Panchak."

Supervisor Janoski, "Come on up here ok. Say that again."

Pat Panchak, "My name is Pat Panchak. I just have one comment to make. You say this is going to bring people in Riverhead jobs. How many engineers in Riverhead that can make over 40 thousand dollars a year, are out of work today? I don't think to many of them."

PUBLIC HEARING Continued

Supervisor Janoski, "Why do you oppose this mam? I don't understand."

Pat Panchak, "I don't. I'm not opposing."

Supervisor Janoski, "Why are you..."

Pat Panchak, "I don't. Wait a minute, I'm speaking. I don't understand that much about it. This was a point that was made, was that it would bring jobs to them. I would like you to think about it."

Supervisor Janoski, "I am thinkg about it. We do seriously take these things into consideration."

Pat Panchak, "That's all I want to know. I'm not against it."

Supervisor Janoski, "What drives me crazy is that; I came into office in a town that was on the ropes and declining and dying. We are trying to turn that around and we are having some success. It drives me crazy when people stand up to the microphone and say don't let this happen in our town. We're bringing in a business."

Pat Panchak, "I'm sorry. You misunderstood me. I'm not saying don't bring it into the town. I don't know that much about it. I don't know the size of the tank."

Supervisor Janoski, "There is no tank. I mean he made up the tank. Would you tell me what tank we're talking about?"

Pat Panchak, "But I'm saying I don't understand and I'm not telling you....."

Supervisor Janoski, "I'm so confused about this whole thing that I don't know what we're taling about any more."

Pat Panchak, "I'm not telling you not to bring it in the town. You know a lot more about it when you study it than I do. I would just like you to think about the point that I don't think 15 of these 20 people that are going to be hired are going to be from Riverhead because I don't think we have 15 engineers."

Supervisor Janoski, "I know that. Let me say this mam. Economics is a very involved thing and one of the things that I think about a lot is economics. If you bring in 15 people who make 40 thousand dollars a year, their impact on the economy of Riverhead is not them and their jobs but what they create as far as what they buy, the services they purchase. There are people that are put to work because they are spending money in the community. Their food, they're buying cars, whatever they're buying and it travels throughout the economy of the Town to an extent that you would not believe, these 15 people. So maybe we don't

6/21/83

PUBLIC HEARING ContinuedSupervisor Janoski Continued

15 engineers in the town but they're working in this town and doing business in this town. It will have a dramatic effect on the economy."

Pat Panchak, "Are you sure they're going to live in this town or are they just going to work in this town? I have a husband who's an engineer and makes 40 thousand dollars a year in Easthampton. Not in Riverhead."

Supervisor Janoski, "Does he spend money in Easthampton?"

Councilman Prusinowski, "He's in Riverhead this week."

Pat Panchak, "That's right, Riverhead. He doesn't spend much."

Councilman Prusinowski, "I just want to say one point. Joe I'll just say one point. Riverhead, unlike the other east end towns, is a very different type of geography. I'm in advertising. I can tell you that most of the business that is derived from Riverhead and this was one of the key issues in our fight to keep the courts in Riverhead. We have a lot of transient business people that work in Riverhead, do not live in Riverhead. We have a lot of people on the east end that shop in Riverhead that bring in a lot of money. It's like any other town. A lot of people go to New York City. They go to the plays, they go to the city shopping. Riverhead is fortunate in being like a shoppers town for the east end. There are a lot of people that work for the courts, that work for the insurance companies, that work for title searches, that are lawyers, that don't necessarily live in Riverhead but spend a lot of money and the Community Development office with Councilman Boschetti, and the other members of the committee that work on our trying to save the courts because we just took it out of capital budget. We have another thing going there so that one of the key issues is the impact economically to the Town for this type of people. So if we we had 15 or 20 people that might travel to Riverhead, would have to spend most of the day in Riverhead and I'm sure would have to spend some money somewhere, hopefully. Also the applicant would and I'm not saying, we would still have to consider this. I'm just giving you an answer to your question so that you take Photo Circuits, they have engineers on staff. Hazeltine, it's an assembly plant. They have more supervisory people there. Grumman's has a lot of people that live of town."

Supervisor Janoski, "Once they get a load of this town they're going to move right here."

PUBLIC HEARING Continued

Pat Panchak, "I don't know. They we're talking about that one store that was going to go up. What's the name of it?"

Supervisor Janoski, "Caldors."

Pat Panchak, "Caldors. Well they have big managers and everything. One lives in Holbrook, one lives somewhere. I just don't know. I just think you should think about it."

Supervisor Janoski, "I do think about it all the time."

Pat Panchak, "You know a lot better about this plant going up than I do. I just want you to look at this and think about it."

Frederick Cowan, "I would like to make a comment."

Supervisor Janoski, "Sure."

Frederick Cowan, "The few things I know about any town."

Supervisor Janoski, "Could I just ask you where your husband works in Easthampton?"

Pat Panchak, "Oh I think you know."

Supervisor Janoski, "No tell me."

Pat Panchak, "He works for South Fork Asphalt."

Supervisor Janoski, "South Fork Asphalt, ok. How would you feel (I love to do this) if the people in Easthampton, when he wanted to set up his business, said we don't want South Fork Asphalt here. This guy lives in Riverhead. It's the same kind of thing you understand. It happens to be true. He's got a business which is asphalt, which a lot of people aren't too crazy about. It's an interesting kind of business. Doing a great job down at the parking lot though. I want to tell you he's doing a fantastic job down there but it's a little inconvenient right now, but when it's done it's going to be beautiful. Do you understand what I'm trying to say to you? That your husband has a business in Easthampton. There's nobody funnier than the people in Easthampton, what if they said."

Pat Panchak, "That's why I live in Riverhead not Easthampton."

Supervisor Janoski, "What if they said they didn't want Panchak South Fork Company because he lives in Riverhead and why should this be here. Same kind of thing. I understand your concern but I'm just trying to make you understand that it's true in a lot of...."

PUBLIC HEARING Continued

Pat Panchak, "I do understand and I'm not saying they shouldn't be here. I'm just saying that I think that something. You're say it's going to bring money into Riverhead and it's going to mean jobs."

Supervisor Janoski, "I hope so."

Pat Panchak, "I don't know if it's Riverhead jobs that it's going to be. I hope it is too but I don't know and I think that is something."

Supervisor Janoski, "Plus we're going to tax them too."

Pat Panchak, "Oh well that's a different situation. My husband doesn't spend much money in Easthampton."

Supervisor Janoski, "I hope not."

Pat Panchak, "I can't afford it to begin with."

Frederick Cowan, "What I was going to comment on is the obvious thing; that when kids graduate high-school, Riverhead kids that is, some of them go to college. Some of them try to be engineers and some of them come back to Riverhead looking for jobs. There's no reason in the world why we wouldn't want to hire one of them."

Supervisor Janoski, "Absolutely and that's one of the things that the Town Board is aiming toward; is trying to get our young people to find jobs here so that they don't have to go away to find the kind of job that you're offering. Thank you Mr. Cowan. Is there anyone, Steve. Where can you find cheaper entertainment then this?"

Steve Haizlip, "Mr. Janoski and the other Board members, I believe it was April 6th. I'm trying to search back to the year. When did we have that snow storm? Two years ago or one?"

Supervisor Janoski, "Two years ago."

Steve Haizlip, "Right, ok. On the talk show, now first off I want it to be understood that I'm not for or against this gentleman. I'm just only going to state a fact that's been brought up. Now on the talk show, there was some people from the Motor Vehicle Department and they was asking for some people to call in and they were talking about the emissions. It happened to be that day and the guy's name was Al. I called him and I talked to him. Now from what I understood, fuel oil, which they have mentioned, which is burned in trucks and is the same as diesel oil. His answer was, to that day when I asked him about this emission, he said that when it burns and leaves the stack and falls on the ground there are no emission, I mean no pollution. I'm sorry. That is on tape in Riverhead radio station."

PUBLIC HEARING Continued

Supervisor Janoski, "Thank you Steve. Is there anyone, (Peter Danowski sit down) is there anyone else present who wishes to address the Town Board on the matter of the application of Fred and Mildred Cowan. That being the case, I declare the hearing closed. Now there was a young lady who wanted to address the Board on a water problem. Before I adjourn I would like to recognize her. Where is she? Ok. After this speaker, I'm going to recess. We're all going to have a cigarette."

Susan Magee, "I'm Susan Magee. I'm a Reeves Park resident also. I'm twenty-eight years old. I have a nine year old daughter. I spoke to you Mr. Janoski during the week, May 15. You knew the problem. It's been in the headlines. Here you stated tonight was the first time when you spoke with Mrs. O'Hare."

Supervisor Janoski, "No. You misunderstood me. What I said was, that this was the first time that the Town Board has entered into an act of negotiations with the companies. I said that we've known about the problem. Mrs. O'Hare wrote me a long time ago about this. I've talked to you. I've talked to a number of people but, go on make your statement."

Susan Magee, "As for our conversation that we had on the telephone, it was advised by you. You'll be reading it in the papers. I'll talk it over with everybody. You were going to meet with the legislatures, blah blah this, blah blah that. Lucky enough, Dorothy called me last night to advise me of this. Then she advised me, this temik that we have was there. Now you said that they take different readings of temik. Ok. Sometimes it's low, sometimes it's high. Mr. Janoski we haven't had rain for an entire month now, so of course we're not going to have levels of temik. I'm a farmer's daughter, I know that. Something has to be done. There are small innocent children up in that park. I'm going to speak on behalf of the women and the young men up there. Now we really seriously hope you consider running the main down Roanoke. If it cost extra money finebut I want you to think of the people and the young children up there. You also have to remember it's got a public beach up there, toilet facilities. If this is the case, you're going to have to close that. Something else you better consider."

Supervisor Janoski, "Yes."

Susan Magee, "Ok, I just want you to consider everything. You have a lot of, I don't want anybody to get me wrong tonight, elderly people here tonight. Not too many young people from the park. No seriously. Really you do. There's not too many young people here tonight but doggone it I want to live here another fifty years. I don't want to absorb this stuff and I don't want my daughter to absorb this stuff and if I have any another children, I don't want them to absorb this stuff. Something has got to be done."

PERSONAL APPEARANCES Continued

Supervisor Janoski, "Well I thought we had pretty much indicated what we were going to do."

Susan Magee, "Pretty much so yes. I mean something has got to be definite."

Supervisor Janoski, "One point that you made was that I did tell you that you would be reading in the paper about this study which, Sam still here? Sam when do we expect the study to be completed? Just roughly. It doesn't have to be a date."

Sam McLendon, "It will be late summer."

Supervisor Janoski, "Ok."

Sue Magee, "Late summer."

Supervisor Janoski, "But that's the, mam."

Sue Magee, "You've got this whole summer."

Supervisor Janoski, "I know. I understand it's a problem. A long time ago we started this process. We are going to attempt to get a filter put in there as soon as possible."

Sue Magee, "That's something else."

Supervisor Janoski, "That's an interim solution."

Sue Magee, "Another question that I'm going to bring up to this Town Board is that as far as our pressure is there, whether you put a filter in there or not. Putting a filter in there is going to decrease the power. We don't have pressure now as it is. I'm at the end of the line."

Supervisor Janoski, "Mam, ok."

Sue Magee, "I'm at the end of the line ok. Also, god forbid if there is ever a fire up there because you got houses maybe fifty feet apart from one another. You've got houses that will go up just like that before any Fire Department got up there."

Supervisor Janoski, "Mam, I don't know what I can say."

Pat Panchak, "No pressure, can't drink the water, can't bathe in the water. You can, you flush the toilet all you get is air."

PERSONAL APPEARANCES Continued

Supervisor Janoski, "You wives, you understand, when you bought your home, you didn't buy your home?"

Susan Magee, "Yes, I bought my home. Perfect condition. Water was fine, everything was great, up until now."

Supervisor Janoski, "You had a private water system?"

Susan Magee, "Yes."

Supervisor Janoski, "Now."

Susan Magee, "But as prior, we have spent years trying to get town water up there. Can I ask you another question?"

Supervisor Janoski, "Sure."

Susan Magee, "Just off the record."

Supervisor Janoski, "I'm afraid not off the record."

Susan Magee, "If Rolling Woods, if Dolphin Way needed water, where would you run the main?"

Supervisor Janoski, "I don't know."

Susan Magee, "You know darn well where you would run it."

Councilman Prusinowski, "Excuse me."

Susan Magee, "You'd run it down (excuse my language) Roanoke."

Councilman Prusinowski, "I just want to make one statement for the bottom line here. As a member, as every individual board member here, we made this deal with the Flagg Country Club because we had another option. The option was we could have approved the project of their putting in their own private water system. The concern of the Town, excuse me."

Supervisor Janoski, "Just line the one they have."

Councilman Prusinowski, "The concern of the Town Board was, and this is the bottom line, was to get water on Sound Avenue. We think we have done it the smart way which is the way to have a private concern pick up a huge portion of the cost. The water system will not be extended by the end of the summer to Reeves Park. I'm going to tell you something you don't want to hear. The thing that the Town can do with the Supervisor, is they can work to get the filter in to make sure the water is safe. I have a temik filter in my house. I live in South Jamesport and we're loaded. Do you know what our temik count is?"

PERSONAL APPEARANCES Continued

Susan Magee, "I know all about temik."

Councilman Prusinowski, "Our temik count is 55. Now the think is, we're trying to get the water up to Sound Avenue. This project will get it up there and from there, there has to be a process that follows that you have to petition the Town Board to extend the Water District."

Susan Magee, "May I ask you something? If Flagg Country Club hadn't petitioned this, at all, to put that water main there to the condominiums and we came down here tonight and asked for water, what would the Town do for us?"

Supervisor Janoski, "Mam, if you don't know the answer to that question...."

Susan Magee, "I don't."

Supervisor Janoski, "Then you haven't been paying attention tonight. You know we've been talking for hours about this."

Susan Magee, "Mr. Janoski, I've been hearing a lot of things that you have been up and down about."

Supervisor Janoski, "I don't think so mam. I think what your having trouble with, this extension up to Flagg is being paid for. They have given us 485 thousand dollars. If that wasn't being done and you came in to ask the Town Board, it would be 485 thousand dollars that you people up there would have to pay and that's the answer to the question. That's why I say I don't know why you haven't gotten that. What ever extension is done, somebody is going to have to pay for it. The five guys down here or up here, or where ever we are. We don't generate this money out of the air. We get it from you people."

Susan Magee, "Oh, I know it. At tax time."

Supervisor Janoski, "Right, but this particular matter of water extension doesn't come from this tax time and that the point all of us, I think, have been trying to make, it's a very seperate thing. Now I think we have agreed to a number of things tonight. That the town is trying to negotiate an immediate installation of filter, that we all sit down with a representative group from Reeves Park, with the Town Attorney and representatives of our consulting engineers, to determine how you want to proceed as far as an extension into your area, once we get Baiting Hollow done and if you are agreeable to what, in means in dollars and cents and that's what it means, it will get done."

Councilman Artale, "If I may, one of the things you seem to point out is that you want a solution right now. Sam I think you could probably bare me out. If we started tomorrow, it would take six months."

PERSONAL APPEARANCES Continued

Susan Magee, "You know it's just something that, like I said, I'm young. We've got innocent children up there."

Supervisor Janoski, "I know."

Susan Magee, "You know, it's not, it's another thing. Everything is a smile, It's not a smile, it really isn't."

Supervisor Janoski, "You know what? I'm happy that I can smile up here."

Susan Magee, "But I'm not. It's serious."

Supervisor Janoski, "What do you want us to do mam?"

Susan Magee, "Well I don't want you to smile, that's for sure. It's not funny."

Supervisor Janoski, "You know mam, I know it's not funny."

Susan Magee, "Everybody's going to be sitting back in their lounge chairs laughing, grinning, whatever. When Mr. Littlefield was up here...."

Supervisor Janoski, "You know, one of the things that we can hold on to, is a little bit of humor. This is a serious problem, but you know we would lose our minds if we couldn't have a little bit of relaxation and humor."

Susan Magee, "Well that's what we're losing right now with this temik."

Supervisor Janoski, "What can I tell you that will satisfy you here tonight?"

Susan Magee, "I guess nothing really. Nothing has been done and nothing probably will be done."

Supervisor Janoski, "Mam, I want to tell you that this Town Board has been actively engaged in trying to solve this problem for some time."

Susan Magee, "You just said you didn't know about this tonight."

Supervisor Janoski, "You know I think you're having a great deal of difficulty understanding what I've been saying."

Susan Magee, "Temik, no service of water."

PERSONAL APPEARANCES Continued

Supervisor Janoski, "I'm just going to ignore that. Thank you. Sam would you please and Mrs. O'Hare would you later please try to straighten out the lady who's leaving? You know, when you called me, I've returned your calls. Is that true? We've had conversations. When you called me, I got in touch with the County. I did all those things that I'm supposed to do, I think. We've got a town working on trying to get this filter."

Susan Magee, "Somewhere along the line I would like to have the opportunity to thank you for this. Also question number one. Somebody and you have more power than I have, has got to get this information available to the people. You should have a mimeographed right here in Town Hall, to tell these people what this stuff can do to you."

Supervisor Janoski, "Nobody knows."

Councilman Boschetti, "Nobody knows mam."

Susan Magee, "Well I got to know."

Supervisor Janoski, "Mam, Sam, mam let me get back to you. Sam please make your statement."

Sam McLendon, "I just wanted to make a point to follow the young lady there. I thought I had made it clear earlier, that the difference of length in pipe required to go up Roanoke and over to Osborne Avenue, was longer than it and a difference in length more than it would take to come back from Osborne Avenue to Park Drive after this line was in."

Supervisor Janoski, "This was one of the things that we had resolved but she didn't hear."

Sam McLendon, "No. Reeves Park and Roanoke Water company are in the study area. They happen to be, as a result of the Baiting Hollow Condominium project, a lot easier to address and come up with a final cost effective solution I believe. So that, following your suggestion of a separate meeting perhaps even that particular spot can be exhilarated and pushed ahead of the rest of the study. In regard to the study, we were only able to look at the small private systems within the past week or ten days. That's one of the things that's been deterring the study of getting further along, but Reeves Park, Roanoke Water Company area, can be addressed as a separate thing and incorporated into that study later if you so desire."

Supervisor Janoski, "Ok, Thank you Sam."

John Littlefield, "I hate to tell you this Joe but your coffee is getting cold. Take a break will you, for gods sake."

6/21/83

PERSONAL APPEARANCES Continued

Supervisor Janoski, "All right. We're going to have a recess until 25 minutes past 10."

John Littlefield, "You're entitled Joe."

SUPERVISOR JANOSKI RECESSED THE MEETING
AT 10:10 p.m. and RECONVEINED AT 10:25 P.M.

Supervisor Janoski, "You know even when times are really bad, I always continually have this smile on my face. It's one of the things that, guess I shouldn't frown either. Well I guess we should move on to the resolutions. Well we're going to do that anyhow."

William Kasperovich, "Open the agenda."

Supervisor Janoski, "I already did open it up for public comment. We got through that."

William Kasperovich, "I got a cup of coffee, sat here waiting for that."

Supervisor Janoski, "What we're going to do Bill, we're going to do the resolutions and then as is my practice, before I adjourn, I will once again open the meeting for public comment but before we move on to the resolutions, I want to make clear an understanding as to what's going to happen now. Jack and Mrs. O'Hare I'm depending on them to be in touch with me so that we can set up the meeting that we talk about, with our consulting engineers and the members of the Town Board and of course our legal staff, so that you, in turn, can take the legal steps necessary to petition the Town Board to consider this water. We'll go through the process. In the meantime, we will continue with our efforts tomorrow to get the filter installed so that provides the interim solution and I think that's really the most important thing and that that's done as soon as possible. We're on your side. This is what we get paid to do and hopefully when we get finished, we will have accomplished what we have set out to do. Let us proceed with the resolutions."

RESOLUTIONS#348 AUTHORIZES TOWN CLERK TO ADVERTISE FOR BIDS ON ONE (1) 1983 DUMP TRUCK - HIGHWAY DEPT.

Councilman Artale offered the following resolution which was seconded by Councilman Boschetti.

RESOLVED, That the Town Clerk of the Town of Riverhead be and is hereby authorized to advertise for sealed bids for the purchase of one (1) 1983 Dump Truck 162 w.b. 84 ca for the use of the Town of Riverhead Highway Department, and be it

The resolution was thereupon declared duly adopted.

#353 APPROVES SITE PLAN OF CENTRAL SUFFOLK HOSPITAL

Councilman Prusinowski offered the following resolution which was seconded by Councilman Lombardi.

WHEREAS, the site plan of Central Suffolk Hospital as depicted by architectural drawings prepared by DiGiorgio/Wakefield, licensed architects and engineers, initially dated April 8, 1983 pages L-1, L-1A, L-1B, L-2, L-3, L-4, and E1-0 of job #2811, was referred by the Building Department to the Town Board for site plan review on May 23, 1983, and

WHEREAS, by application to the Town of Riverhead Zoning Board of Appeals, a determination has been made that:

1. The side yard width of 45 feet shall be permitted;
2. A building area of 24% of the total area be permitted;
3. Parking be allowed in the area designated as open space;
4. The present parking spaces measuring 9 feet by 19 feet be permitted to remain;
5. The three loading berths be permitted instead of four;
6. The cooling Tower of the height shown on the site plan be permitted; and

WHEREAS, the Town Board has carefully reviewed the proposed site plan,

NOW, THEREFORE, BE IT RESOLVED, that the site plan of Central Suffolk Hospital as depicted by architectural drawings prepared by DiGiorgio/Wakefield, licensed architects and engineers, initially dated April 8, 1983, pages L-1, L-1A, L-1B, L-2, L-3, L-4, and E1-0, of job #2811, be and is hereby approved subject to any and all restrictions and limitations as outlined in the Riverhead Town Code.

The vote, Boschetti, yes, Artale, yes, Prusinowski, yes, Lombardi, yes, Janoski, yes.

The resolution was thereupon declared duly adopted.

6/21/83

RESOLUTIONS-Continued

The resolution was thereupon declared duly adopted.

#362 APPROVES SPECIAL PERMIT APPLICATION OF BERNARD SENEAU, ET AL.

Councilman Boschetti offered the following resolution which was seconded by Councilman Artale.

WHEREAS, by application dated March 28, 1983, Bernard Seneau, Michelle Seneau, Jeffrey L. Lown and Jovencio Meneses, did apply to this Town Board for a special permit to operate and maintain a bakery and wholesale baking business on the west side of Edwards Avenue, Calverton, New York, and

WHEREAS, Bernard Seneau, Michelle Seneau, Jeffrey L. Lown and Jevencio Meneses are the contract vendees of a Contract of Sale dated the 17th day of February, 1983, with Henry G. Weyerhaeuser, owner of the subject property, and

WHEREAS, this matter was referred to the Planning Board for their review and recommendation, and

WHEREAS, by letter dated April 18, 1983, the Planning Board did recommend that the special permit application be approved, and

WHEREAS, a public hearing was held by this Town Board on the 3rd day of May, 1983, wherein all persons wishing to be heard were heard,

NOW, THEREFORE, BE IT

RESOLVED, that the special permit application of Bernard Seneau, Michelle Seneau, Jeffrey L. Lown and Jovencio Meneses, contract vendees of a Contract of Sale dated the 17th day of February, 1983, with Henry G. Weyerhaeuser, owner of the subject property, to operate and maintain a bakery and wholesale baking business on the west side of Edwards Avenue, Calverton, New York, be and is hereby approved, subject to:

1. Any and all restrictions and/or limitations as outlined in the Riverhead Town Code Chapter 108
2. Site plan review by the Riverhead Town Board and be it further

RESOLUTIONS Continued

RESOLVED, that the Town Clerk shall forward a certified copy of this resolution to Bernard Seneau, Michelle Seneau, Jeffrey L. Lown, and Jovencio Meneses.

The vote, Boschetti, yes, Artale, yes, Prusinowski, yes, Lombardi, yes, Janoski, yes.

The resolution was thereupon declared duly adopted.

#363 AUTHORIZES THE TOWN CLERK TO PUBLISH AND POST NOTICE TO BIDDERS, RE: MAIN STREET LIGHTING

Councilman Artale offered the following resolution which was seconded by Councilman Boschetti.

RESOLVED, that the Town Clerk be and is hereby authorized to publish and post the attached Notice to Bidders with regard to receiving sealed bids for Main Street Lighting Improvements, Phase II, in the Town of Riverhead.

NOTICE TO BIDDERS

NOTICE IS HEREBY GIVEN that SEALED BIDS for Main Street Lighting Improvements, Phase II, in the Town of Riverhead, will be received by the Town Clerk of the Town of Riverhead at the Town Hall, 200 Howell Avenue, Riverhead New York until 11:00 a.m. prevailing time, on Thursday, July 14, 1983, at which time and place they will be publicly opened and read for the following contract:

MAIN STREET LIGHTING IMPROVEMENTSPHASE II

Plans and Specifications may be obtained at the Town Hall and at the offices of the Consulting Engineers, HOLZMACHER, MCLENDON & MURRELL, P.C., at 209 West Main Street, Riverhead, New York and 125 Baylis Road, Suite 140, Melville, New York upon deposit of Fifty Dollars (\$50.00) for each set furnished.

Deposits for Plans and Specifications will be refunded to bidders who return same within ten (10) days in good condition; other deposits will either be partially or not refunded if the Plans and Specifications have not been returned in good condition within thirty (30) days after bids have been opened.

Each Proposal must be accompanied by a certified check bid bond in the amount of five percent (5%) of the total bid, made payable to Town of Riverhead, as set forth in the INFORMATION FOR BIDDERS.

RESOLUTIONS Continued

The Town Board reserves the right to reject any or all bids, to waive any informalities and to accept such alternate bids which, in the opinion of the Town Board, will be in the best interest of the Town.

The vote, Boschetti, yes, Artale, yes, Prusinowski, yes, Lombardi, yes, Janoski, yes.

The resolution was thereupon declared duly adopted.

#364 PUBLIC PARKING II CAPITAL PROJECT - BUDGET ADJUSTMENT
TRANSFER OF FUNDS

Councilman Prusinowski offered the following resolution which was seconded by Councilman Lombardi.

RESOLVED, that the Supervisor be, and hereby is authorized to transfer the following funds in the Public Parking II Capital Project:

The resolution was thereupon declared duly adopted.

RESOLUTIONS Continued

- #368 AUTHORIZES THE CONSERVATION ADVISORY COUNCIL TO ENGAGE THE SERVICES OF GORDON AHLERS TO OBTAIN THE PERMITS FOR A RIVER ACCESS FACILITY AT FORGE ROAD

Councilman Prusinowski offered the following resolution which was seconded by Councilman Lombardi.

Whereas, the Conservation Advisory Council has recommended that Gordon Ahlers be retained to assist the Conservation Advisory Council in obtaining the necessary permits from the Department of Environmental Conservation for river access to the Peconic River in the vicinity of Forge Road,

NOW, THEREFORE, BE IT

RESOLVED, that the Conservation Advisory Council be and is hereby authorized to engage the services of Gordon Ahlers to be paid from the Conservation Advisory Council budget and to serve at the direction of the Conservation Advisory Council.

The vote, Boschetti, yes, Artale, yes, Prusinowski, yes, Lombardi, yes, Janoski, yes.

The resolution was thereupon declared duly adopted.

- #369 AMENDS RESOLUTION #161 OF RIVERHEAD FLAGG CORPORATION

Councilman Lombardi offered the following resolution which was seconded by Councilman Prusinowski.

WHEREAS, by resolution dated November 3, 1982, #680, this Town Board approved the special permit of Riverhead Flagg Corporation for the construction of 300 Condominium units to be clustered in the north section of a 191 acre parcel located in the hamlet of Baiting Hollow, Town of Riverhead, New York, subject to site plan approval, and

WHEREAS, by resolution dated March 22, 1983, this special permit was amended to require Attorney General approval before a certificate of occupancy be issued, and

WHEREAS, by resolution #161 of March 22, 1983, this Town Board approved the site plan as submitted and recited therein subject to further approval of a typical parking layout, which approval was granted by resolution #188 of April 5, 1983, and

WHEREAS, applicant, Baiting Hollow Development Corp., successor in interest to Riverhead Flagg Corporation, has submitted a modified site plan as depicted on the drawings of landscape architecture and planning partnership "layout plan", drawing #L-1 through L-9 dated by transmittal to Weber and Pohl, Esqs., attorneys, on May 18, 1983,

RESOLUTIONS Continued

NOW, THEREOFRE, BE IT

RESOLVED, that resolution #161 dated March 22, 1983, approving the site plan of Riverhead Flagg Corporation be and is hereby amended to add the following:

Section - site master plan dated March 7, 1983, including landscaping, drainage, lighting, and parking to be amended to read: Drawings of landscape architecture and planning partnership "layout plan" drawing #L-1 through L-9 dated by transmittal to Weber and Pohl, Esqs., attorneys, on May 18, 1983.

The vote, Boschetti, yes, Artale, yes, Prusinowski, yes, Lombardi, yes, Janoski, yes.

The resolution was thereupon declared duly adopted.

#370 AUTHORIZES BUILDING DEPARTMENT TO ISSUE BUILDING PERMIT
RE: FLAGG

Councilman Boschetti offered the following resolution which was seconded by Councilman Artale.

WHEREAS, the Riverhead Building Department has requested the advice of this Town Board as to whether the requirements of the various resolutions pertaining to Riverhead Flagg Corporation has been met sufficiently to permit the issuance of a building permit, and

WHEREAS, this Board has reviewed the material submitted by Riverhead Flagg Corporation and Baiting Hollow Development Corp., successor thereto,

NOW, THEREFORE, BE IT,

RESOLVED, that this Town Board finds:

1. That the water supply is currently the subject of action by this Town Board, Riverhead Flagg Corporation having paid into the escrow account \$485,000 for public water and therefore, it is inappropriate to delay the issuance of a building permit while public water is provided;

2. That the approval of the Suffolk County Department of Health be received before a Certificate of Occupancy be issues;

3. That the necessary site plans have been approved by this Town Board;

4. That this determination by this resolution shall pertain only to the first 18 units to be constructed directly north of the existing clubhouse.

RESOLUTION Continued

The vote, Boschetti, yes, Artale, yes, Prusinowski, yes, Lombardi, yes, Janoski, yes.

The resolution was thereupon declared duly adopted.

Supervisor Janoski, "Well we have completed the formal part of this Town Board Meeting. I know that Mr. Kasperovich has a map here and he would like to present it. The contents there of in a dissertation to the Town Board, so I will open up the meeting to public comment at this time. You're on."

William Kasperovich, Gentlemen first, let me say that, with all your knowledge of good governments, to put item ten on the agenda at the tail end, mutes any individual from commenting on your resolutions, This certainly is not good government and I, at this point, offer my formal objection to this procedure. So let the record show. As far as this map that lays here on the table, it is a zoning map that is currently in use to indicate the printed law of the New York State Motor Vehicle Bureau as applied to Riverhead Township. I have done this as accurately as possible and with as much clarity as possible. After speaking to about everybody concerned and at some lengths with the Chief of Police and his Captain and his Lieutenant, at considerable lengths with the Justice Manning and Justice Leonard and to considerable length with John Ziemacki Highway Superintendent, it would appear that once again we have a fragmented situation and the ifs ands or buts with regard to speed limits, should be brought to date with concurrence and approval with New York State Motor Vehicle Bureau as soon as practically possible. It seems that over the phone to Albany, it was made perfectly clear to me and it was concurred to by Justices Manning and Leonard that if it is not in the printing of the New York State Law that the Town's designations cannot be enforced in court. Now, apparently we have an awkward situation on Parker Road in Wading River, where city signs are posted in both directions for a road about a mile long for some 30 mile speed limit and yet the law is printed specifically, exempts Parker Road. Gentleman in Hauppauge, which was supposed to explain this to me, has not been available since last week, Wednesday, and so I have no answer for why."

Supervisor Janoski, "Did you find reference to Parker Road in some legal document?"

William Kasperovich, "If you read the copies that Mr. Arlas sent over to your office for Wading River, your home area, you would have found Parker Road...."

Supervisor Janoski, "Exactly my point."

PERSONAL APPEARANCES Continued

William Kasperovich, "Specifically excluded."

Supervisor Janoski, "Exactly my point Bill, because Parker Road doesn't exist. It is North Country Road. Some how people started calling it Parker Road and some time ago Parker Road was a little wood road through that area up there. Parker Road does not exist anywhere."

William Kasperovich, "Since that discription, the start and end is Sound Avenue and Manorville/Wading River Road, it can't possibly be any other road by what ever name but be that as it may, it's still 30 and it's just a matter of legality. Same in the home town. They included half, the northerly half approximately, of Hulse Landing Road in the 30 mile speed limit area. I've related this information over to the County Public Works and their engineer, his name escapes me at the moment, said he'll put it in process to check it out and go through the procedure either to take acceptions or post signs. So that's it. They were as surprised as it was when I first read it, that such a thing exist. However, when we get it to the hamlet area and we get to the more easterly and there are some open questions, both of discription and legality and I think some effort has to be made to check the bad areas and the bad spots by designations or what ever. Certainly if we're going to expect the men to do a good job enforcing the law, we've got to give them the grounds to which to enforce it. Something that we want enforcement on certain specific areas and so I plotted this because it can be read easily. You can see everything that's in printed. My first long telephone conversation with Albany was; is this all the print? I couldn't believe this was all the print and they assured me that that's it. So you could read it as is. If you want to keep it or use it for any length of time, I would be happy to duplicate this on another map, if you see use for it. I would like to read, hold on to it while I'm taking my trip to Hauppauge and if anybody calls me on the telephone, since I've been on the phone quite a bit, I'd like to have it in front of me."

Supervisor Janoski, "You can certainly have it Bill."

William Kasperovich, "If you feel there is a use for it or it would be helpful in the follow through, I'd be happy to duplicate this on another set."

Richard Ehlers, "We can copy it. It would be good to have it if you are offering it."

Supervisor Janoski, "Could we borrow that one for a short period of time?"

William Kasperovich, "Yes, yes."

Richard Ehlers, "We'll copy it tomorrow."

PERSONAL APPEARANCES Continued

William Kasperovich, "I'll make an offer. If you want me to copy another print for you, I'd be glad to do that."

Richard Ehlers, "If you leave it here we can copy it tomorrow."

William Kasperovich, "All right, that you gentlemen."

Supervisor Janoski, "Thank you Bill. Is there anyone else who wishes to address the Town Board on any, Steve."

Steve Haizlip, "Joe and the other members, on 362. Now I know this is not fair to the bakery people but, at the time the public hearing was held, the information that was brought up about the temik filters and that contaminater water, 12 or 14 parts per billion. How ever they describe it, is on Edwards Avenue and it is heavy. I know because I have to have two systems in order to get some water. Now I don't know if this was considered by the County Health Department or our own Planning Board or what. As I say, the information wasn't available and I'd like to implement it now and get it on the records so somebody can look into it in construction because they're going to have somewhere, maybe 15 or 20 people working in there baking and drinking water and eating and baking and so forth. I'd like to get that part covered. Thank you."

Bill Roberts, Baiting Hollow, "Question. 369 and 70. Baiting Hollow Development Corporation, successor to Flagg development. When, may I ask, does that take place? Are they the same owners or is this a name they're operating under?"

Supervisor Janoski, "Yes. I think that we started calling them Flagg and it is a misnomer. Actually they have always been Baiting Hollow."

Bill Roberts, "Next question is, the building permit only applied to the first 18 condos?"

Supervisor Janoski, "Thank you. Yes mam."

Anne Hattorf, "I'm Mrs. Hattorf from Reeves Park and I would just like to ask the Town Board a question. The water that we have in Reeves Park is not fit for human consumption. It's not fit to bathe our children in. I worry about if we plant a garden or whatever, all right. What would be involved, let me just through this out to you ok, if you run your water pipes up Osborne Avenue? If all the studies concurred that it is feasibly possible to run along Sound Avenue to Park Road. Is it in the realm of the Town Board and the Board of Health to condemn the existing water system and hook up of the pipes that are there and that you can hook up to that and there are some pipes on Park Road. Ok. If we live in this devastated area, as far as the water goes, or lack of water, is it possible that you could direct your Mr. Scheiner to look into possible federal funds to help us out?"

PERSONAL APPEARANCES Continued

Supervisor Janoski, "Sure. You know one of the things we've been looking at is some source of money for a long time. Let me get back to your first question. That system that exists, I think we have three options. Let me see if I can remember them. One; we can buy it. Two; we could condemn it and of course if we condemn it we still have to pay for it. Third; Mr. Groeber, Mr. Gremler can turn it over to us. I don't know that he's going to do that but I would think that the first two are probably the likely outcome. In both cases there would be a negotiated agreed to price and the first that we purchase it, that the Riverhead Water District purchase it. Two that the courts would decide what a fair price is if we condemn it and that is, as I said some time ago, one of the problems; gaining acquisition to that ore. We would have to put in our own set of pipes which of course there is a cost involved with it."

Anne Hattorf, "Well that's my whole point. The pipe system that is there is not that old because it originally was a summer system that was turned off on April 15th and turned back on, I'm sorry. Turned on April 15th, off on October 15th and the pipes were very narrow metal pipes. Harry Goldman then owned the water system and he put in new pipes. Now I don't know that these pipes are 12 inch pipes."

Supervisor Janoski, "No. We didn't need that. The 12 inch main is just to carry water up to that area."

Anne Hattorf, "Up along Sound Avenue and up to the existing, say pump-house. Is that what we're talking about?"

Supervisor Janoski, "Up to the beginning of your private system."

Anne Hattorf, "The pump-house or the pipes? There are pipes up Sound Avenue to Park Road."

Supervisor Janoski, "Now if you have a pump-house, (I'm not an engineer, you know) whether we would incorporate your pump-house into helping move the water along. That would have to be designed so we get it to that stage, whether that would be incorporated."

Anne Hattorf, "All right. When you say design, are you talking about a very great deal of length of time? I'm talking about a very quick emergency, you know within the foreseeable future and lifetime of all of us senior citizens that live in Reeves Park."

PERSONAL APPEARANCES Continued

Supervisor Janoski, "I think we've pretty well answered that question. What we have to do is get the filter installed to the present system. It has to be done as soon as possible. The outcome of the meeting which the Town Board and all of our people will have with your representatives, will start us on the path to moving the Water District to your area. Of course what's going on in the meantime, is the extension of the Water District system up to Sound Avenue to the Baiting Hollow Development. That's the first step and that should be completed. Once that's done, then we can branch out from that and by that time, we certainly should have all this preliminary work accomplished and we should be able to present to you some meaningful answers."

Anne Hattorf, "Thank you."

Richard Larsen, Wading River, "I'm also a member of the Town Planning Board. I would like to congratulate the Town Board on their understanding of the problems of the water. The Planning Board has looked at it a number of times and we concur in both the development of the water up to the Flagg Country Club and also the development of the further extensions of the Water District throughout the Town as it meets the needs of the people. These things are very slow processes and they do take a lot of time. I think the Board has told everybody in this room and all the people that were here before, many times, that in fact they're the ones who have to make the petitions to the Board for this extension and I know I've been talking to the Supervisor and the Town Attorney and they're both willing to do that and I think that that message must get across to the people. But I think that you guys have done a fantastic job here tonight on a very serious problem. Thank you."

Supervisor Janoski, "Thank you. Could we let that stay as the final word because I would really like that? Well without objection, a very good night to everyone."

There being no further business on motion or vote the meeting adjourned at 11:10 p.m.

IJP:nm

Irene J. Pendzick
Town Clerk
