RESOLUTION #33 ContinuedNOTICE OF COMPLETION OF DRAFT EIS
AND
NOTICE OF SEQR HEARING

Lead Agency: Riverhead Town Board

Address: Riverhead Town Hall
200 Howell Avenue
Riverhead, NY 11901

Date: January 5, 1988

This notice is issued pursuant to Part 617 of the implementing regulations pertaining to Article 8 (State Environmental Quality Review Act) of the Environmental Conservation Law.

A Draft Environmental Impact Statement has been completed and accepted for the proposed action described below. Comments on the Draft EIS are requested and will be accepted by the Riverhead Town Clerk until February 8, 1988. A public hearing on the Draft EIS will be held on January 19, 1988 at 7:55 p.m. at the Riverhead Town Hall, 200 Howell Avenue, Riverhead, New York.

Name of Action: Wildwood Village Retirement Community

Description of Action: The objectives of the project sponsor are to provide residential housing in an adult community setting. The proposed development involves the construction of 304 one- and two-bedroom units clustered on 56.64 acres. A total of 51 acres will be preserved for agricultural uses.

Location: Sound Avenue
Town of Riverhead, 107.64-acre site located approximately 700 feet west of the intersection of Sound and Fresh Pond Avenues.
Suffolk County, State of New York

RESOLUTION #33 Continued

Potential of Environmental Impacts: The following items have been identified as possible major environmental issues: There would be an impact of the permanent loss of approximately 56.64 acres of active agricultural land. This land could no longer be utilized for agricultural purposes, nor could it be utilized as a habitat for various vegetation and wildlife species. It is expected that during the construction of the proposed development, as with all developments, there will be some soil erosion as a result of the removal of vegetative cover. The proposed action will result in the following unavoidable short-term impacts, particularly during the construction phase: presence of construction and other associated vehicles on the project site and on area roadways; localized change in air quality due to emissions from construction and other associated vehicles, as well as, increased dust levels from same; localized increase in noise levels as a result of the operation of construction and other associated vehicles. A long-term impact of the proposed action would be the localized increased vehicular traffic levels due to the occupation of the proposed development. These increased traffic levels would have a concurrent increase in air quality and noise level impacts. The proposed action will result in the unavoidable impact of changing the scenic and visual quality of the subject parcel from that of open, expansive views containing active agricultural activities to one interrupted by 304 condominium units.

Riverhead, NY 11901

Date: January 5, 1988

This notice is issued pursuant to Part 617 of the implementing regulations pertaining to Article 8 (State Environmental Quality Review Act) of the Environmental Conservation Law.

A Draft Environmental Impact Statement has been completed and accepted for the proposed action described below. Comments on the Draft EIS are requested and will be accepted by the Riverhead Town Clerk until February 8, 1988. Public hearing on the Draft EIS will be held on February 2, 1988 at 7:45 p.m. at the Riverhead Town Hall, 200 Howell Avenue, Riverhead, New York.

Name of Action: Cross River Project

Description of Action: The objectives of the project sponsor are to provide a recreational sports residential community providing for 380 one- and two-bedroom units, a public Health Club and recreational amenities (tennis courts, platform tennis, pitch and putt golf course, bicycle and jogging path, clubhouse), clustered on 22.002 acres and leaving as open space about 56.354 acres.

Location: A 78.356-acre triangular site located east of County Road 105, south of the Long Island Railroad right-of-way and north of Saw Mill Brook, Riverhead. Suffolk County, State of New York.

RESOLUTION #38 Continued

Potential of Environmental Impacts: Adverse short-term impacts will include the following: a portion of the existing topography of the Project Site will be modified by clearing of vegetation, grading, excavation and mounding of soils; soils will be disturbed by grading and excavation during project construction, and temporary increases in soil erosion will result; the vegetation existing on the 22.002 acres that will be utilized for construction of the improvements on the site will be removed in clearing; the wildlife utilizing the Project Site and immediate adjacent areas will be temporarily displaced onto adjacent open space lands; operation of construction equipment and trucks, and worker vehicles may temporarily impede local traffic during the construction period; minor releases of air contaminants, such as carbon monoxide and nitrogen dioxide will occur from construction equipment; the visual quality of the area may be degraded by the presence and operation of construction equipment on the Applicant's site; and slight increases in noise levels at the site boundary may result from construction activities. Potential long-term adverse impacts of the Project will be associated with the following areas: air quality along congested roadways will be adversely affected by minor amounts of exhaust emissions from project generated traffic; and there will be a permanent loss of agricultural use of the two small farm fields lying immediately south of the Long Island Railroad right-of-way.
