**July 23, 2018**

**ADDENDUM No.2**

**TOWN OF RIVERHEAD**

**BID FOR 2017 OR NEWER FIRST RESPONDER VEHICLE.**

Please note that this is the first addendum to the Bid for 2017 OR NEWER FIRST RESPONDER VEHICLE. The corrections and clarifications set forth in this Addendum shall supersede and prevail as the bid specifications and shall hereby be made a part of the Contract Document of the bid for the Town of Riverhead.

**This addendum is to correct the enclosed drawings of the dimensions requested for the front console and rear cabinet that were omitted from the original bid specifications.**

**The front console is for radios and siren technology so there technically no drawings for same. It is usually fabricated from metal and purchased from vendor building the console to fit within the area.**

**The drawing below is just for the rear cabinet not the front console.**

**Thank you.**

It is recommended that the overall layout of the cabinet be similar to the one drawn below. The right (passenger) side of the cabinet must include a fully insulated climate controlled area, and be configured such that the customer can mount a narcotics safe within this area. Below depicts a drawing of the left (driver) side with open faced with (1) adjustable shelf and the left side includes (1) 115v Outlet and (2) 12v outlets. The left (driver) backside of the cabinet shall include an open storage area with a cargo style net to retain the stored equipment. This are shall also include (1) 115v Outlet and (2) 12v outlets
